PROFESSIONAL SUMMARY

Backend-focused software engineer with hands-on Go, cloud APIs, distributed data pipelines, and production mobile/backend platforms. Strong systems foundation across Go, C/C++, SQL, AWS, Docker, Redis, PostgreSQL, Linux, CI/CD, and observability.

TECHNICAL SKILLS

Languages: Go, Python, TypeScript/JavaScript, C/C++, Rust, SQL, Bash

Go & Backend: REST APIs, microservices, goroutines, channels, context, middleware, unit testing

Cloud & DevOps: AWS (EC2, S3, Lambda), Docker, CI/CD, Linux, Git, observability

Data & Messaging: PostgreSQL, Redis, MongoDB, MySQL, SQLite, MQTT, real-time streaming pipelines

Frontend & Mobile: React Native, Next.js, React, iOS/Android deployment

EXPERIENCE

Software Engineer II / Tech Lead

2Cents Capital

Jul 2025 – Present

Bengaluru, India

- First engineer hire; led 10+ engineers across mobile, AI, backend, and quantitative finance while defining architecture and release standards.
- Shipped Valura AI on iOS and Android with production backend integrations, sub-500 ms cold-start latency, 4.8-star App Store rating, and thousands of active users.
- Designed backend infrastructure for market-data ingestion, backtesting, automated order execution, and real-time portfolio workflows.
- Established CI/CD, automated tests, and observability, reducing post-release bugs by 60% and maintaining 95% on-time releases.

Software Engineer Intern

Visteon (Jaguar Land Rover)

Jan 2025 – Jun 2025

Chennai, India

- Built diagnostic routines for JLR platforms with 96% anomaly detection accuracy across safety-critical runtime paths.
- Optimized SOME/IP middleware in C on QNX/Linux, cutting service-discovery latency by 25% for real-time automotive services.

Automation Intern

Procter & Gamble

Dec 2024 – Jan 2025

Hyderabad, India

- Deployed IIoT telemetry across 5 manufacturing lines ingesting 2M+ data points/day at 99.9% uptime, eliminating 40% of manual inspections.

IoT Developer

Tynatech Ingenious

May 2024 – Jun 2024

Noida, India

- Built REST API gateway and webhooks connecting 50+ LoRaWAN edge devices to cloud platforms.
- Optimized UART buffering for 30% throughput gain and implemented MQTT streaming at 100+ msg/s.

R&D Intern

Hindustan Aeronautics Ltd (HAL)

Aug 2023 – Sep 2023

Bangalore, India

- Optimized autopilot control algorithms by 22% and built C++ simulation framework covering 200+ validation scenarios.

PROJECTS

Level2 — Gym Management Platform | Go, React Native, AWS

2025

- Built Go-backed gym management platform live on iOS App Store and Google Play for workout tracking, scheduling, and member operations.
- Designed event-driven sync architecture with REST APIs and cloud persistence, achieving sub-second consistency across distributed mobile clients.

Full-Stack AI Personal Assistant | Go, PostgreSQL, Google A2A, React

2024

- Engineered Go backend services to orchestrate async agents across Google Workspace operations including mail, calendar, and docs.
- Modeled PostgreSQL knowledge graph data to ground responses, personalize actions, and support retrieval-heavy workflows.

Naar — Restaurant Operations Platform | Next.js, Node.js, PostgreSQL, AWS

2025

- Built restaurant operations platform (naarkuwait.com) with admin dashboard, kitchen display, and ordering, reducing processing time by 50%.
- Implemented role-based access control and real-time order pipeline supporting concurrent multi-interface sessions.

Social Media Automation Engine | Python, FastAPI, Redis, AWS

2024

- Built cloud-native service processing 1,000+ daily interactions at 99.5% uptime with LLM-powered sentiment analysis at 88% accuracy.
- Implemented Redis caching layer that reduced external API calls by 65% and kept p50 latency under 500 ms.

EDUCATION

Vellore Institute of Technology

B.Tech. Electronics & Computer Engineering; GPA: 8.66/10

Chennai, India
