PROFESSIONAL SUMMARY

Mobile developer specializing in React Native, with proven experience shipping high-performance cross-platform apps to iOS App Store and Google Play. Expert in TypeScript/JavaScript, mobile architecture patterns, and optimization techniques. Strong track record of leading mobile teams, delivering production apps with sub-second cold-start times, and integrating native modules for platform-specific features.

TECHNICAL SKILLS

Mobile: React Native, Expo, TypeScript, JavaScript, React, React Navigation, Native Modules
State & Data: Redux, Zustand, React Query, AsyncStorage, MMKV, SQLite, PostgreSQL, REST APIs
Testing & Quality: Jest, React Native Testing Library, Detox, ESLint, TypeScript
Deployment & DevOps: App Store Connect, Google Play Console, Fastlane, EAS, GitHub Actions, AWS, Docker
Performance: Metro bundler optimization, Code splitting, Image optimization, Native bridge profiling
Leadership: Cross-functional team coordination, Agile/Scrum, Technical mentorship, Code reviews

EXPERIENCE

Software Developer 2

Jul 2025 – Current

2Cents Capital

Bengaluru, India

- Architected and led development of React Native investment app from ground up, shipping to 10,000+ users on iOS and Android with 95% on-time feature delivery across 10+ engineers.
- Optimized app performance achieving <0.5s cold-start time through code splitting, lazy loading, and Metro bundler configuration; reduced bundle size 40% via tree-shaking and native module integration.
- Implemented CI/CD pipeline with Fastlane and GitHub Actions, automating builds, testing, and deployments to TestFlight/Play Console, reducing release cycle from 2 days to 2 hours.
- Integrated native modules for biometric authentication, secure storage, and push notifications; built custom bridge for seamless iOS/Android financial SDKs integration.
- Established mobile development best practices including TypeScript migration, Jest/Detox testing suite (85% coverage), and component library achieving 99.9% crash-free rate.

Embedded Software Developer

Jan 2025–Jun 2025

Visteon

Chennai, India

- Optimized real-time UI rendering and data processing for automotive dashboards, reducing frame drops 25% through efficient memory management and event-loop optimization—directly applicable to mobile performance tuning.
- Implemented comprehensive test automation achieving 99.8% code coverage with unit and integration tests; established quality gates preventing regressions in production builds.
- Built diagnostic monitoring system processing 1000+ events/second with sub-10ms latency, demonstrating expertise in performance-critical applications.

Automation Intern

Dec 2024–Jan 2025

Procter & Gamble

Hyderabad, India

- Built real-time monitoring dashboards processing 2M+ data points daily with 99.9% uptime, applying responsive design patterns and efficient data visualization techniques.
- Developed automated workflows and data-driven interfaces, reducing manual processes 40% through intuitive UI/UX design.

IoT & LoRaWAN Developer

May 2024–Jun 2024

Tynatech Ingenious Pvt Ltd

Noida, India

- Architected RESTful APIs and webhook integrations connecting 50+ IoT devices to cloud platforms, providing robust backend services for mobile/web clients.
- Implemented real-time WebSocket/MQTT streaming handling 100+ messages/second, enabling live data visualization in frontend applications.

Full Stack Developer Intern

Oct 2023–Dec 2023

Intellect Design Arena

Chennai, India

- Optimized web application performance achieving 30% faster page loads through code splitting, lazy loading, and asset optimization techniques.
- Built responsive analytics dashboards with real-time data updates, applying mobile-first design principles for seamless cross-device experience.
- Managed cloud deployment and CI/CD pipelines for five applications, ensuring 99.9% availability through automated testing and monitoring.

PROJECTS

Full-Stack AI Personal Assistant | *Go, Google A2A, PostgreSQL, React* Dec 2024

- Engineered and deployed a cloud assistant that centralizes and automates personal workflows.
- Built asynchronous agents to orchestrate complex Google Workspace operations (mail, calendar, docs).
- Modeled a personal knowledge graph to ground answers and personalize actions.

Instagram Automation Bot | *Python, FastAPI, Redis, AWS* Dec 2024

- Deployed cloud bot handling 1000+ daily interactions with 99.5% uptime.
- Added LLM-based sentiment/intent detection achieving 88% accuracy in production.
- Introduced Redis caching to cut Meta Graph API calls 65%; p50 response <500 ms.

Multipurpose VR Gloves with Gesture Recognition | *Unity, C#, ESP32, ML* Sep 2024

- Built VR gloves capturing 15+ gestures at 92% accuracy using flex-sensor ML pipelines.
- Developed a web UI to map gestures to 20+ system commands; integrated Unity for gaming/assistive control.

RAK Gateway Configurator | *Python, Flask, SQL, Bash* Jun 2024

- Created full-stack tool streamlining configuration of RAKwireless LoRaWAN gateways for network admins.
- Automated device discovery, credential management, and firmware upgrades.

Wearable Jump-Height Measurement Device | *ESP32, MPU6050, Flask* Mar 2024

- Ankle-mounted sensor reached ± 1 cm accuracy vs lab force-plates.
- Used Kalman filtering to suppress sensor noise 80%; built SQLite/Flask analytics dashboard.

RFID-based Runner Tracking System | *Industrial RFID, PHP, Raspberry Pi* Dec 2023

- Automated timing for 5km training runs via industrial RFID readers.
- Web interface enabled seamless record management and legacy-system integration.

EDUCATION

Vellore Institute of Technology

Chennai, India

B.Tech. Electronics & Computer Engineering; GPA: 8.66/10
